

«We should preserve every scrap of biodiversity as priceless while we learn to use it and come to understand what it means to humanity.»

— Edward O. Wilson

Exchanging ideas

How is all life interrelated? And how can we preserve the basis of our own survival? The museum is dedicated to these fundamental questions that drive biodiversity studies.

In close collaboration with researchers, it gives an insight into new questions and findings – in the exhibition and beyond. Thus, we create a space of interaction between the university and the citizens.

The future location of the museum

The Zoological Museum
becomes the
Biodiversity Museum

The metamorphosis of a museum

In 2023 the transformation is complete: After a long period of closure, the Zoologisches Museum Göttingen will open its gates as the Biodiversity Museum.

Visitors of all ages are invited to explore the new, interactive exhibition in which the treasured zoological collections of the University will come to life again. The museum will be housed in the former building of the Naturhistorisches Museum in Berliner Straße, upstairs from the Forum Wissen.

Biodiversity is the variety of life on Earth, in all its forms and all its interactions. Humans and human cultural diversity also form part of it.

The exhibition will take you on a journey through the wonderful world of biodiversity.

MARVEL

UNDERSTAND

GET ACTIVE

Stunning exhibits, multimedia stations, hands-ons and simulations depict the diversity of life and inspire you to marvel and to understand – with all senses.
